

US Solar Mounts

Innovative Aeration Solutions

PRO-Series Diffusers

QUALITY MATERIALS

Our PRO-Series diffusers use quality, durable materials and they're built to last a lifetime. We use Laser-Cut Stainless Steel, Stainless Hardware and High-Flow Extruded Tubing. Overbuilt? Probably, but that's why we back them up with a Lifetime Warranty.

HIGH EFFICIENCY

We use American-Made High-Flow Aeration Tubing. It is extremely durable and provides micro-bubble performance with nearly zero back-pressure.

EASY INSTALLATION

The PRO-Series Diffusers are designed to be easily assembled in just a few minutes. They have a great fit & finish and have no sharp edges.

TECHNICAL SUPPORT

If you need some help, we've got you covered. Product selection, system design, lake mapping and technical help are just a phone call away. Our Technical Support is 100% US-Based and in-house.
